Neil Campbell joined Faber in 2021, after working in the life sciences transactional practice for a leading global law firm.

He counsels clients in a variety of transactional matters relating to drug and device clinical trials, supply chain, licensing and collaboration, service arrangements and technology evaluation agreements. Prior to starting his legal career, Neil spent a decade as a biomedical researcher. In that role, he gained a deep scientific and industry context that enables him to appreciate clients' scientific development strategies and provide them with thoughtful and pragmatic counsel.
